Subject: Draft 2013 TIP and Draft Transportation-Air Quality Conformity Analysis

I would like to make some comments regarding the MTC's appropriation of funds to the Eastern Contra Costa Transit Authority (Tri Delta Transit).

Although MTC's appropriation of funds is appreciated, and I completely understand that funds are mostly appropriated based on the population served, I think in the future there needs to be some adjustment for such things as the Clipper Card and electronic signs that raise all transit agencies served to an equal access level. In my mind, the Clipper Card should be on all agencies served as soon as possible. Internal bus, rail and BART information signs should also provide the same information in a consistent manner, such as the time, clarity of the announcing voice and detail of the next stop information. Next bus, rail and BART information should be available by text message as well as voice phone and internet on all MTC served agencies.

Thank you for all of your hard work on behalf of the public!
